

INTERACTOR®

BIO INPUT FOR AGRICULTURAL USE,
BIOLOGICAL INOCULANT TYPE

GUARANTEED COMPOSITION

Active ingredient

Metarhizium anisopliae (1×10^6 conidia / mL)
Beauveria bassiana (1×10^6 conidia / mL)
Lecanicillium lecanii (1×10^6 conidia / mL)
Paecilomyces fumosoroseus (1×10^6 conidia / mL)

Adherents and surfactants

Formulation: Suspension Concentrate (SC)

*Updated Technical Sheet: 02 / 12-2021

INTERACTOR®

It is a product for agricultural use that contains a compatible consortium of fungi such as *Metarhizium anisopliae*, *Beauveria bassiana*, *Lecanicillium lecanii* and *Paecilomyces fumosoroseus*; These microorganisms are generally found in the rhizosphere and have been selected to promote plant growth, development and improve the economic performance of crops.

RECOMMENDATIONS FOR USE

CULTIVE	PLAGUE	DOSE c.c./Liter	RECOMMENDATIONS
Avocado	Promoter of increase vegetable.	0.5 to 2 cc/L	After preparing and disinfecting the avocado seeds, immerse them for 24 hours in the INTERACTOR® solution. At the time of transplantation to the bag, apply 100 mL in a drench. of the solution in the indicated dose and repeat the application after 30 and 60 days.

STORAGE

INTERACTOR® should be stored in its original and closed container, in a cool, dry and shady place. In these conditions it lasts between three and six months after being formulated.

INSTRUCTIONS FOR USE:

Before using it, it is recommended to shake the **INTERACTOR®** and previously dilute it in water according to the recommended dose until it is completely homogenized and then proceed to complete the desired volume. It must be ensured that it covers the substrate or soil evenly. The product can be applied in drench, sprinkler or by localized irrigation system (drip); It is suggested to use 1 L/ha and make an application at least every month.

COMPATIBILITY

INTERACTOR® is compatible with most insecticides. Do not mix with fungicides of unknown compatibility. Consult the

Technical Department of BIOQUIRAMA for your concerns or suggestions

PRESENTATION

INTERACTOR® is presented to the public in a concentrated suspension liquid formulation in containers of: 250 milliliters, 1, 4 and 20 liters.

PHYTOTOXICITY

INTERACTOR® is not phytotoxic if used according to the instructions for use on the recommended crops.

SECURITY PERIOD

It does not require a grace period, but it is advisable to use the minimum protective equipment for spraying the product on crops. For better product effectiveness consult our technical department.

TOXICOLOGICAL CLASSIFICATION: III

Microbial consortium for soil
